

"NEW TODDLER PROGRAM"

Children of the Earth Montessori School is proud to announce the opening of its new TODDLER PROGRAM.

This program is specially designed for the 2-3 years old child. Students must be 2 years old by September 1st in order to be eligible for the program.

The importance of development and learning between birth and three years of age cannot be underestimated. The Montessori toddler environment [classroom] is set up in the same learning areas as the pre-primary classroom, but the materials within these areas are geared to this age child. Emphasis is placed on Practical Life and Sensorial experiences encouraging the child to develop independence, exploration, socialization and verbal language skills. Children learn care of oneself and the environment as they increase the control of large and fine motor skills.

This classroom will be staffed by an experienced teacher and assistant. If you want a loving, respectful and developmentally appropriate school experience for your child, this is the program you are looking for.

Parents may preference a 3 or 5 day option [full or half day].
