

CHILDREN OF THE EARTH MONTESSORI SCHOOL

TODDLER PROGRAM

Our Toddler Montessori Program is available for children age 18 – 36 months. The Montessori methods of education are used with the goal of helping children to develop character, skills and education.

Our Toddler Program is offered in a half or full days with your choice of three days a week or five days a week.

Activities in the toddler program are designed to nurture and empower each individual child. Our program promotes

development of social skills, emotional growth, and physical coordination as well as cognitive preparation. The holistic curriculum allows the child to experience the joy of learning from a very young age.

The Montessori toddler environment [classroom] is set up in the same learning areas as the primary classroom, but the materials within these areas are geared to this age child. Emphasis is placed on Practical Life and Sensorial experiences encouraging the child to develop independence, exploration, socialization and verbal skills. Children learn care of oneself and the environment as they increase the control of large and fine motor skills.

We offer a safe and nurturing environment in an inviting school setting with trained staff focused on meeting the individual needs of each learner. Children in the program are exposed to age appropriate stimulating, and meaningful activities.
